## VOLUME 3

4	Environmental Consequences .....	4.1-1
4.1	Existing Mitigation Measures .....	4.1-1
4.1.1	JPO Oversight .....	4.1-1
4.1.1.1	Compliance Requirements and the Role of the Government and the JPO .....	4.1-3
4.1.1.2	Adaptive Nature of the Grant in Compliance Monitoring .....	4.1-3
4.1.1.3	Risk-Based Compliance Monitoring .....	4.1-3
4.1.1.4	JPO Comprehensive Monitoring Program .....	4.1-4
4.1.1.5	Corrective Actions Requiring Memoranda .....	4.1-5
4.1.1.6	The JPO's Interpretation of "Compliance" .....	4.1-5
4.1.1.7	Reliability-Centered Maintenance — JPO Oversight into the Future .....	4.1-6
4.1.1.8	Coordinated Planning and Response to Abnormal Incidents .....	4.1-8
4.1.2	Design Features as Mitigation .....	4.1-9
4.1.2.1	Design Elements .....	4.1-9
4.1.2.2	Special Installation Techniques and Foundations .....	4.1-9
4.1.2.3	Corrosion Control Features .....	4.1-14
4.1.2.4	Earthquake Mitigation Measures .....	4.1-15
4.1.2.5	Special Design Considerations for River Crossings .....	4.1-16
4.1.2.6	Volatile Organic Emission Control .....	4.1-16
4.1.2.7	Ballast Water Treatment at the Valdez Marine Terminal .....	4.1-17
4.1.2.8	TAPS Main-Line and Pump Station Valves as Mitigation Features .....	4.1-17
4.1.2.9	TAPS Leak Detection Systems .....	4.1-18
4.1.2.10	Special Designs for Designated Big Game Crossings .....	4.1-19
4.1.3	Mitigation through TAPS Operational Controls .....	4.1-20
4.1.3.1	Administrative Controls .....	4.1-20
4.1.3.2	Monitoring, Surveillance, and Maintenance .....	4.1-21
4.1.3.3	Biological Considerations for Operations and Maintenance Activities .....	4.1-31
4.1.4	Spill Prevention and Response .....	4.1-34
4.1.4.1	Pipeline .....	4.1-37
4.1.4.2	Valdez Marine Terminal .....	4.1-39
4.1.4.3	Prince William Sound .....	4.1-40
4.1.4.4	North Slope .....	4.1-42
4.1.5	Social, Cultural, and Economic Mitigation Features .....	4.1-43
4.2	Impacting Factors .....	4.2-1
4.2.1	Factors Resulting from the Existence of TAPS Facilities .....	4.2-1
4.2.2	Factors Associated with Routine TAPS Operations .....	4.2-2
4.2.2.1	Routine Pump Station Operation .....	4.2-2
4.2.2.2	Routine Valdez Marine Terminal Operation .....	4.2-3
4.2.2.3	Routine Operations of the Pipeline .....	4.2-3
4.2.2.4	Routine and Preventive Maintenance Actions .....	4.2-4
4.2.2.5	Repair Activities .....	4.2-6
4.2.2.6	Planned and Potential Upgrades .....	4.2-10
4.2.2.7	Health and Safety Impacts Associated with the Proposed Action ..	4.2-19
4.2.3	Impacting Factors Associated with Routine TAPS Operations during the Less-Than-30-Year Grant Renewal Alternative .....	4.2-20

## CONTENTS (Cont.)

4.2.4	Impacting Factors Associated with Planned Activities under the No-Action Alternative.....	4.2-21
4.2.4.1	Stoppage of Product Flow and System Cleaning.....	4.2-21
4.2.4.2	Removal of Aboveground Facilities.....	4.2-22
4.2.4.3	Revegetation and Restoration.....	4.2-24
4.2.4.4	Health and Safety Impacts Associated with the No-Action Alternative.....	4.2-24
4.2.5	Nonroutine Factors – Spills Hazards under the Proposed Action.....	4.2-25
4.2.5.1	Natural Events.....	4.2-25
4.2.5.2	Human Events.....	4.2-27
4.2.5.3	Changes to Impacting Factors for Nonroutine Events as a Result of Planned Pump Station Upgrades and Modifications.....	4.2-27
4.2.6	Impacting Factors Associated with Nonroutine Events – Spills during the Less-Than-30-Year Renewal Alternative.....	4.2-28
4.2.7	Nonroutine Factors Associated with Unplanned Events: Spills during the No-Action Alternative.....	4.2-28
4.2.7.1	Natural Events.....	4.2-28
4.2.7.2	Human Events.....	4.2-28
4.3	Proposed Action Alternative Analysis – Routine Operations.....	4.3-1
4.3.1	Physiography and Geology.....	4.3-1
4.3.2	Soils and Permafrost.....	4.3-1
4.3.3	Seismicity.....	4.3-5
4.3.4	Sand, Gravel, and Quarry Resources.....	4.3-6
4.3.5	Paleontology.....	4.3-6
4.3.6	Surface Water Resources.....	4.3-6
4.3.6.1	Impacts to Surface Water along the TAPS ROW.....	4.3-6
4.3.6.2	Surface Water Impacts on the TAPS Pipeline.....	4.3-9
4.3.7	Groundwater Resources.....	4.3-10
4.3.8	Physical Marine Environment.....	4.3-12
4.3.8.1	Discharges from the Valdez Marine Terminal.....	4.3-12
4.3.8.2	Trace Elements.....	4.3-13
4.3.8.3	Hydrocarbons.....	4.3-13
4.3.8.4	TAPS-Associated Marine Transportation.....	4.3-13
4.3.9	Air Quality.....	4.3-15
4.3.9.1	Criteria Pollutants.....	4.3-15
4.3.9.2	Hazardous Air Pollutants.....	4.3-17
4.3.9.3	Other Pollutants.....	4.3-18
4.3.9.4	Visibility.....	4.3-18
4.3.9.5	Acid Deposition.....	4.3-19
4.3.10	Noise.....	4.3-20
4.3.11	Transportation.....	4.3-20
4.3.11.1	Aviation.....	4.3-21
4.3.11.2	Marine.....	4.3-21
4.3.11.3	Rail.....	4.3-21
4.3.11.4	Road.....	4.3-21
4.3.12	Hazardous Materials and Waste Management.....	4.3-22
4.3.12.1	Hazardous Materials Management.....	4.3-22
4.3.12.2	Waste Management.....	4.3-24
4.3.12.3	Hazardous Wastes.....	4.3-25
4.3.12.4	Solid Wastes.....	4.3-27
4.3.12.5	Wastewater.....	4.3-31

## CONTENTS (Cont.)

	4.3.12.6 Special Wastes .....	4.3-33
4.3.13	Human Health and Safety .....	4.3-35
	4.3.13.1 Occupational .....	4.3-35
	4.3.13.2 Public .....	4.3-39
4.3.14	Biological Resources Overview .....	4.3-42
4.3.15	Terrestrial Vegetation and Wetlands .....	4.3-43
	4.3.15.1 Impacts of Facility Presence .....	4.3-43
	4.3.15.2 Impacts of Normal Operations, Monitoring, and Maintenance .....	4.3-45
4.3.16	Fish .....	4.3-49
	4.3.16.1 Impacts of Alteration and Loss of Habitat .....	4.3-49
	4.3.16.2 Impacts of Obstruction of Fish Passage .....	4.3-52
	4.3.16.3 Impacts of Increased Human Access .....	4.3-53
4.3.17	Birds and Terrestrial Mammals .....	4.3-53
	4.3.17.1 Habitat Loss, Alteration, or Enhancement .....	4.3-54
	4.3.17.2 Disturbance and Displacement .....	4.3-55
	4.3.17.3 Mortality .....	4.3-57
	4.3.17.4 Obstruction to Movement .....	4.3-58
4.3.18	Threatened, Endangered, and Protected Species .....	4.3-58
	4.3.18.1 Impacts to Spectacled and Steller’s Eiders .....	4.3-59
	4.3.18.2 Impacts to Fin Whale, Humpback Whale, Beluga Whale, and Steller Sea Lion .....	4.3-63
	4.3.18.3 Impacts to Other Species .....	4.3-63
4.3.19	Economics .....	4.3-64
	4.3.19.1 Assumptions Used in the Analysis .....	4.3-64
	4.3.19.2 National Economic Impacts .....	4.3-66
	4.3.19.3 State Economic Impacts .....	4.3-68
	4.3.19.4 Sensitivity of Impacts to Changes in TAPS Throughput and Changes in World Oil Prices .....	4.3-77
	4.3.19.5 Regional Economic Impacts .....	4.3-82
	4.3.19.6 Alaska Native Corporations .....	4.3-84
	4.3.19.7 Subsistence .....	4.3-84
4.3.20	Subsistence Impacts .....	4.3-84
	4.3.20.1 Recent Change in Subsistence: An Overview of Potential Causes and Consequences in the Vicinity of the TAPS .....	4.3-87
	4.3.20.2 Potential Subsistence Impacts of Renewing the TAPS ROW .....	4.3-88
	4.3.20.3 Evaluating Potential Subsistence Impacts of Renewing the TAPS ROW .....	4.3-91
4.3.21	Sociocultural Systems .....	4.3-93
	4.3.21.1 Alaska Native Sociocultural Systems .....	4.3-93
	4.3.21.2 Non-Native Sociocultural Systems .....	4.3-98
4.3.22	Cultural Resources .....	4.3-98
4.3.23	Land Use and Coastal Zone Management .....	4.3-99
	4.3.23.1 Land Use .....	4.3-99
	4.3.23.2 Coastal Zone Management .....	4.3-100
4.3.24	Recreation, Wilderness, and Aesthetics .....	4.3-101
	4.3.24.1 Recreation .....	4.3-101
	4.3.24.2 Wilderness .....	4.3-103
	4.3.24.3 Aesthetics .....	4.3-104
4.3.25	Environmental Justice .....	4.3-105
4.4	Spills Analysis for Proposed Action .....	4.4-1
	4.4.1 Spill Scenarios .....	4.4-1

## CONTENTS (Cont.)

	4.4.1.1 Pipeline and Valdez Marine Terminal Spill Scenarios and Locations .....	4.4-2
	4.4.1.2 Transportation-Related Spill Scenarios .....	4.4-11
	4.4.1.3 Catastrophic Spills at Environmentally Important Pipeline or Valdez Marine Terminal Locations .....	4.4-11
4.4.2	Hydrological Analysis of Spill Events .....	4.4-21
4.4.3	Fire Analysis of Spill Events .....	4.4-23
	4.4.3.1 Valdez Marine Terminal Fire Event .....	4.4-24
	4.4.3.2 Pipeline Fire Scenario .....	4.4-30
4.4.4	Impacts of Spills on Environmental Receptors .....	4.4-31
	4.4.4.1 Soils and Permafrost .....	4.4-31
	4.4.4.2 Paleontology .....	4.4-34
	4.4.4.3 Surface Water Resources .....	4.4-35
	4.4.4.4 Groundwater Resources .....	4.4-54
	4.4.4.5 Physical Marine Environment .....	4.4-60
	4.4.4.6 Air Quality .....	4.4-67
	4.4.4.7 Human Health and Safety .....	4.4-72
	4.4.4.8 Biological Resources Overview .....	4.4-98
	4.4.4.9 Terrestrial Vegetation and Wetlands .....	4.4-99
	4.4.4.10 Fish .....	4.4-102
	4.4.4.11 Birds and Terrestrial Mammals .....	4.4-108
	4.4.4.12 Threatened, Endangered, and Protected Species .....	4.4-111
	4.4.4.13 Economics .....	4.4-118
	4.4.4.14 Subsistence .....	4.4-121
	4.4.4.15 Sociocultural Systems .....	4.4-124
	4.4.4.16 Cultural Resources .....	4.4-127
	4.4.4.17 Land Uses and Coastal Zone Management .....	4.4-128
	4.4.4.18 Recreation, Wilderness, and Aesthetics .....	4.4-133
	4.4.4.19 Environmental Justice .....	4.4-137
4.5	Less-Than-30-Year Renewal Alternative Analysis .....	4.5-1
	4.5.1 Summary Description of the Less-Than-30-Year Renewal Alternative .....	4.5-1
	4.5.1.1 Introduction .....	4.5-1
	4.5.1.2 Spill Scenarios under the Less-Than-30-Year Renewal Alternative .....	4.5-1
	4.5.2 Impact Analysis of the Less-Than-30-Year Renewal Alternative .....	4.5-5
	4.5.2.1 Physiography and Geology .....	4.5-5
	4.5.2.2 Soils and Permafrost .....	4.5-5
	4.5.2.3 Seismicity .....	4.5-7
	4.5.2.4 Sand, Gravel, and Quarry Resources .....	4.5-7
	4.5.2.5 Paleontology .....	4.5-7
	4.5.2.6 Surface Water Resources .....	4.5-7
	4.5.2.7 Groundwater Resources .....	4.5-7
	4.5.2.8 Physical Marine Environment .....	4.5-7
	4.5.2.9 Air Quality .....	4.5-8
	4.5.2.10 Noise .....	4.5-9
	4.5.2.11 Transportation .....	4.5-9
	4.5.2.12 Hazardous Materials and Waste Management .....	4.5-9
	4.5.2.13 Human Health and Safety .....	4.5-10
	4.5.2.14 Biological Resources Overview .....	4.5-11
	4.5.2.15 Terrestrial Vegetation and Wetlands .....	4.5-11
	4.5.2.16 Fish .....	4.5-12
	4.5.2.17 Birds and Terrestrial Mammals .....	4.5-13

## CONTENTS (Cont.)

	4.5.2.18 Threatened, Endangered, and Protected Species.....	4.5-14
	4.5.2.19 Economics .....	4.5-14
	4.5.2.20 Subsistence .....	4.5-15
	4.5.2.21 Sociocultural Systems .....	4.5-15
	4.5.2.22 Cultural Resources .....	4.5-16
	4.5.2.23 Land Uses and Coastal Zone Management .....	4.5-16
	4.5.2.24 Recreation, Wilderness, and Aesthetics.....	4.5-17
	4.5.2.25 Environmental Justice .....	4.5-17
4.6	No-Action Alternative Analysis .....	4.6-1
4.6.1	Summary Description of the No-Action Alternative .....	4.6-1
	4.6.1.1 Description of Termination Activities and Long-Term Restoration of the TAPS ROW .....	4.6-1
	4.6.1.2 Spill Scenarios under the No-Action Alternative.....	4.6-2
4.6.2	Impact Analysis of the No-Action Alternative .....	4.6-6
	4.6.2.1 Physiography and Geology .....	4.6-6
	4.6.2.2 Soils and Permafrost .....	4.6-7
	4.6.2.3 Seismicity .....	4.6-8
	4.6.2.4 Sand, Gravel, and Quarry Resources.....	4.6-8
	4.6.2.5 Paleontology .....	4.6-8
	4.6.2.6 Surface Water Resources.....	4.6-9
	4.6.2.7 Groundwater Resources.....	4.6-13
	4.6.2.8 Physical Marine Environment.....	4.6-15
	4.6.2.9 Air Quality .....	4.6-18
	4.6.2.10 Noise.....	4.6-25
	4.6.2.11 Transportation.....	4.6-26
	4.6.2.12 Hazardous Materials and Waste Management.....	4.6-28
	4.6.2.13 Human Health and Safety.....	4.6-34
	4.6.2.14 Biological Resources Overview.....	4.6-37
	4.6.2.15 Terrestrial Vegetation and Wetlands .....	4.6-38
	4.6.2.16 Fish .....	4.6-42
	4.6.2.17 Birds and Terrestrial Mammals.....	4.6-45
	4.6.2.18 Threatened, Endangered, and Protected Species.....	4.6-50
	4.6.2.19 Economics .....	4.6-54
	4.6.2.20 Subsistence .....	4.6-73
	4.6.2.21 Sociocultural Systems .....	4.6-75
	4.6.2.22 Cultural Resources .....	4.6-78
	4.6.2.23 Land Uses and Coastal Zone Management .....	4.6-79
	4.6.2.24 Recreation, Wilderness, and Aesthetics.....	4.6-81
	4.6.2.25 Environmental Justice .....	4.6-86

## TABLES

### VOLUME 3

4.1-1	Federal and State Agencies within the Joint Pipeline Office.....	4.1-2
4.1-2	Federal Grant Stipulations Related to the Mitigation of Impacts on Biological Systems .....	4.1-32
4.2-1	Planned Pump Station Upgrades .....	4.2-13
4.3-1	Potential Impacting Factors of the Proposed Action on Soil and Permafrost.....	4.3-4
4.3-2	Annual Volumes of APSC Waste and Total Volumes of All Wastes Received at Publicly Owned Landfills .....	4.3-29
4.3-3	Annual Occupational Hazard Rates Associated with Continued Operation of TAPS .....	4.3-36
4.3-4	Potential Human Health Risks Associated with Inhalation of Hazardous Air Pollutants in Valdez Area Ambient Air .....	4.3-42
4.3-5	Potential Impacts of the Proposed Action on Threatened, Endangered, and Protected Species .....	4.3-60
4.3-6	Projected North Slope Oil Production and World Crude Oil Prices.....	4.3-65
4.3-7	State Population Projections .....	4.3-68
4.3-8	Projected Alaska Gross State Product by Industry .....	4.3-72
4.3-9	Projected Employment in Alaska by Industry.....	4.3-73
4.3-10	Projected Labor Force Participation, Employment, and Unemployment Rates .....	4.3-74
4.3-11	Projected State Personal Income and Alaska Permanent Fund Dividend .....	4.3-75
4.3-12	Projected State Revenues.....	4.3-76
4.3-13	Projected Local Revenues .....	4.3-77
4.3-14	Projected State Government Expenditures.....	4.3-78
4.3-15	Projected Local Government Expenditures.....	4.3-78
4.3-16	Forecasted Range for North Slope Oil Production.....	4.3-79
4.3-17	Projected State Economic Effects of Changes in TAPS Oil Throughput Rates .....	4.3-80
4.3-18	Projected State Economic Effects of Changes in Crude Oil Prices .....	4.3-81
4.3-19	Projected Pipeline Corridor Region Populations.....	4.3-83
4.3-20	Projected Pipeline Corridor Region Employment.....	4.3-83

**TABLES (Cont.)**

4.3-21	Projected Pipeline Corridor Personal Income .....	4.3-85
4.4-1	Summary of Spill Scenarios for Continued Operation of the TAPS Pipeline .....	4.4-5
4.4-2	Summary of Spill Scenarios for Continued Operations of the TAPS Valdez Marine Terminal .....	4.4-8
4.4-3	Summary of Spill Scenarios for Continued Operation of the TAPS: Transportation Accidents .....	4.4-12
4.4-4	Airports within 10 Miles of the Pipeline .....	4.4-13
4.4-5	Milepost-Specific Maximum Guillotine Break Crude Oil Spill Volumes .....	4.4-16
4.4-6	Maximum Public Exposures to Soot and Fire Combustion Products .....	4.4-26
4.4-7	Maximum Worker Exposures to Soot and Fire Combustion Products, Valdez Marine Terminal Scenario 10 .....	4.4-27
4.4-8	Thermal Radiation Exposures, Valdez Marine Terminal Scenario 10 .....	4.4-28
4.4-9	Maximum Public Exposures to Soot and Fire Combustion Products, Pipeline Scenario 19b .....	4.4-31
4.4-10	Maximum Public Exposures to Soot and Fire Combustion Products Close to the Fire, Pipeline Scenario 19b .....	4.4-32
4.4-11	Approximate Maximum Oil Discharges at Major and Minor Elevated River Crossings Produced by a Guillotine Break in the Pipeline .....	4.4-38
4.4-12	River Parameters for Spill Analyses.....	4.4-39
4.4-13	Estimated Response Times for Various Spill Locations and a Guillotine Pipeline Break .....	4.4-40
4.4-14	Location of the Leading Edge of the Oil Slick at Estimated Average Response Times .....	4.4-40
4.4-15	Summary of Spill Results for a Worst-Case Anticipated Spill Scenario.....	4.4-41
4.4-16	Estimated Response Times for Various Spill Locations for a Likely Spill Scenario .....	4.4-43
4.4-17	Summary of Spill Results for a Worst-Case Likely Spill Scenario and a Small Hole .....	4.4-43
4.4-18	Summary of Spill Results for a Worst-Case Likely Spill Scenario and a Large Hole.....	4.4-44
4.4-19	Summary of Spill Volumes, Rates, and Drainage Times for River Crossings under Different Throughputs .....	4.4-46

## TABLES (Cont.)

4.4-20	Summary of Spill Analyses for a Worst-Case Unlikely Guillotine Break during High-Flow Conditions for Three Pipeline Throughput Levels.....	4.4-47
4.4-21	Summary of Spill Analyses for a Worst-Case Unlikely Guillotine Break during Low-Flow Conditions for Three Pipeline Throughput Levels .....	4.4-48
4.4-22	Belowground Segments of Pipeline in the Brooks, Alaska, and Chugach Ranges and Their Maximum Releases of Oil for a Guillotine Break .....	4.4-57
4.4-23	Maximum Release Volumes and Locations for a Belowground Guillotine Break Caused by a Landslide .....	4.4-59
4.4-24	GNOME Model Results for Spills to Port Valdez from the Valdez Marine Terminal .....	4.4-65
4.4-25	Spill Scenarios without Fire, Frequencies, Spill Volumes, and Receiving Media at Selected Spill Locations .....	4.4-68
4.4-26	Vapor Pressures and Weight Percents of Hazardous and Other Toxic Air Pollutants in North Slope Crude Oil, Turbine Fuel, and Arctic Grade Diesel Fuel .....	4.4-70
4.4-27	Estimated Emission Rates of Hazardous and Other Toxic Air Pollutants from Evaporation of Spilled Materials without Associated Fire .....	4.4-73
4.4-28	Alaska Cleanup Levels for Hydrocarbon-Contaminated Soil .....	4.4-76
4.4-29	Inhalation Impacts of Pipeline Spills: Maximum 1-Hour Pollutant Concentrations and Impact Distances.....	4.4-80
4.4-30	Inhalation Impacts of Valdez Marine Terminal Spills: Maximum 1-Hour Pollutant Concentrations and Impact Distances .....	4.4-84
4.4-31	Inhalation Impacts of Transportation Spills: Maximum 1-Hour Pollutant Concentrations and Impact Distances .....	4.4-87
4.4-32	Inhalation Impacts of Spills to Rivers: Maximum 1-Hour Pollutant Concentrations and Impact Distances.....	4.4-89
4.4-33	Near-Field Impacts of Crude Oil Spills with Associated Fire .....	4.4-93
4.4-34	Far-Field Impacts of Crude Oil Spills with Associated Fire.....	4.4-95
4.4-35	Foodchain Risk from Ingestion of PAH-Contaminated Shellfish Compared with Risk from Ingestion of Smoked Salmon.....	4.4-97
4.4-36	Estimated Proportions of Oil to Water under High- and Low-Flow Conditions for Hypothetical Guillotine Breaks at Selected River Crossings .....	4.4-106
4.4-37	Potential Impacts of Oil Spills on Threatened, Endangered, and Protected Species .....	4.4-113
4.4-38	Impacts of Spill Scenarios on Daily State Revenues in 2004 .....	4.4-119
4.4-39	Summary of Anticipated Impacts under Spill Scenarios .....	4.4-139

## TABLES (Cont.)

4.4-40	Communities within 13.0 km of the TAPS Possibly Experiencing High Human Health Impacts due to <i>Unlikely</i> or <i>Very Unlikely</i> Spills .....	4.4-142
4.4-41	Selected Communities Possibly Affected by Worst-Case <i>Very Unlikely</i> Guillotine Break during Low-Flow Conditions, Gulkana and Copper Rivers.....	4.4-143
4.5-1	Summary of the Effects of the Renewal Period on Spill Scenarios.....	4.5-6
4.6-1	Possible Durations of Termination Activities and Long-Term Restoration under the No-Action Alternative .....	4.6-2
4.6-2	Summary of Spill Scenarios for the No-Action Alternative .....	4.6-3
4.6-3	Anticipated Potable Water Use during Termination Activities.....	4.6-11
4.6-4	Anticipated Process Water Use during Pipeline Dismantlement and Removal Phase .....	4.6-11
4.6-5	Estimated Potential Average Annual Emissions of Criteria Pollutants and Volatile Organic Compounds from Termination Activities.....	4.6-20
4.6-6	Estimated Potential Average Annual Emissions of Criteria Pollutants and Volatile Organic Compounds from Vehicular and Rail Traffic.....	4.6-22
4.6-7	Estimated Potential Average Annual Emissions of Hazardous Air Pollutants from Termination Activities.....	4.6-24
4.6-8	Annual Waste Shipments during Pipeline Termination Activities .....	4.6-28
4.6-9	Maximum Annual Occupational Hazards Associated with Termination Activities under the No-Action Alternative .....	4.6-36
4.6-10	Estimated Sizes of Areas in Which the Aboveground Pipeline and Associated Workpad Are Located in Important Wildlife Habitats.....	4.6-47
4.6-11	Potential Impacts of the No-Action Alternative on Threatened, Endangered, and Protected Species .....	4.6-51
4.6-12	State Population Projections .....	4.6-60
4.6-13	Projected Alaska Gross State Product by Industry .....	4.6-61
4.6-14	Projected Employment in Alaska by Industry.....	4.6-63
4.6-15	Projected Labor Force Participation and Employment and Unemployment Rates .....	4.6-64
4.6-16	Projected State Personal Income and Alaska Permanent Fund Dividend .....	4.6-64
4.6-17	Projected State Revenues.....	4.6-66
4.6-18	Projected Local Revenues .....	4.6-67
4.6-19	Projected State Government Expenditures.....	4.6-68

**TABLES (Cont.)**

4.6-20	Projected Local Government Expenditures.....	4.6-69
4.6-21	Projected Populations in Pipeline Corridor Region.....	4.6-70
4.6-22	Projected Pipeline Corridor Employment.....	4.6-71
4.6-23	Projected Pipeline Corridor Personal Incomes.....	4.6-72

## FIGURES

### VOLUME 3

4.1-1	Typical Pipeline Details for Conventional Burial .....	4.1-13
4.1-2	Typical Pipeline Details for Special Burial .....	4.1-13
4.1-3	Potential Vertical Support Member Movement.....	4.1-13
4.1-4	Typical Thermal Vertical Support Member.....	4.1-14
4.1-5	Smart Pig.....	4.1-22
4.1-6	Typical Intermediate Support Assembly.....	4.1-23
